

How to Install Your Pop Up Display

Estimated Install Time: 10 Minutes

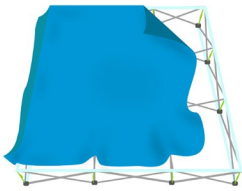

1. Begin by pulling the sides of the frame outward from the center.

2. Once the frame is fully extended, lock all of the green support arms. And lay it down on the ground. This will make it easier to install the fabric in the next step.

3. Next, begin to attach the fabric on the frame. Do this by starting from one corner of the display, attaching the velcro on the fabric to the velcro on the frame.

4. Once the front of the fabric is fully attached, you can then attach the sides of the fabric.

5. Finally you can stand your pop up display upright and attach the LED lights, if you have them.
