

Tension Fabric Display Assembly Instructions

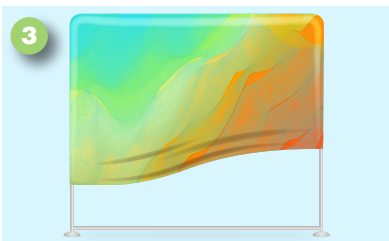

Tension fabric displays are quick and easy to set up. They can be set up by one person in 5-10 minutes.

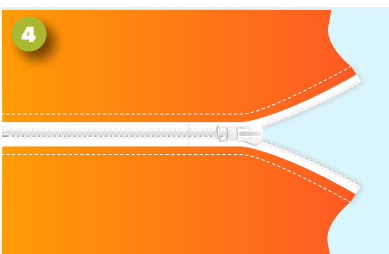

Lay the poles out on the ground in the basic shape of the tension fabric display. Each pole is labeled with a numbered sticker. The numbers will match to show which sides should be connected. Ex. 1 matches with 1, 2 matches with 2, etc.

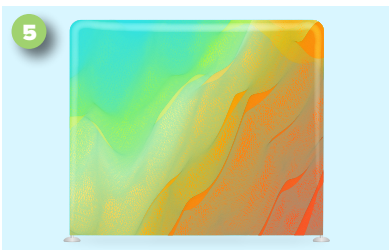

While still on the ground, connect all the poles. The poles use a 'push-button' locking mechanism that secures the poles together. (If it is a straight display, you will need to connect the feet to the poles by screwing them in).

Slide the tension fabric over the now assembled poles.

Zip the bottom of the tension fabric display shut.

Simply lift your Tension Fabric Display upright and voila! Your tension fabric display is ready to go.
